## STORE TEETH FOR SHEEP

Older sheep that suffer the loss of their teeth have a brighter future in store for them—a dentist has come up with a set of false teeth for their declining years. The dental plate for sheep is an

invention of Dr. B.M. Sinn, of Fairplay, Oklahoma, and plans are being made now to mass produce them for sale at \$1 a set. Sheepmen believe that the false teeth will increase the life span of the sheep.—Imperial Farm News.

## Carbon S.D. May Join Big Division

The Board of Trustees of Carbon School District No. 1218 have entered into an agreement with the Board of the Drumheller School Division No. 30 for the inclusion of the Carbon School District into the larger division. A copy of the agreement is available for inspection at the office of the secretary-treasurer, S.F. Torrance.

Notices of the agreement have been posted in the district, and if demand in writing from 25 per cent of the electors of the district for the taking of a vote against inclusion is not made within 21 days of posting of the notices, the district will be included in the larger division.

## MISS MARJORIE LEISKE WINS I.O.D.E. BURSARY

The Duke of York Chapter I.O.D.E. has announced that Miss Marjorie Leske has won the \$25 bursary offered to the scholar with highest honors for examinations in Grade IX of the Carbon school.

## LITTLE ITEMS OF LOCAL INTEREST

Mr. Earl Lambert and Mr. John Todd of Edmonton, former teachers at the Carbon school, attended the I.O.D.E. dance in Carbon Friday evening. Another former teacher present was Mr. V.L. Martin and Mrs. Martin of Hanna.

Visitors at the home of Mrs. Margaret Atkinson over the weekend were Mr. and Mrs. E. Nelson and family of Leduc, Mr. and Mrs. Stan Macell and son of Calgary and Mr. and Mrs. Ralph Atkinson of Edmonton. Mrs. Macell and son are spending this week in Carbon visiting with her mother.

Arnold Martin had the misfortune to injure his right wrist and forearm while working on a shearing machine in the ABC mine at Drumheller and will be off work for the next three weeks.

Mr. and Mrs. Bob Shaw were Calgary visitors Tuesday of this week.

Mr. and Mrs. S.J. Garrett and Mr. and Mrs. Leon Coates attended funeral services for Mr. I. Guttman in Calgary last Friday.

Chris Thumler spent the weekend in Trochu at the home of his brother.

Mr. and Mrs. Art Weigum and daughter, Beverly, spent Remembrance Day visiting relatives at Trochu.

Barry Hunt of Calgary visited for several days last week at the home of his grandparents, Mr. and Mrs. Harry Hunt.

Miss Alba Wheat and Miss Loretta Talbot of Calgary were weekend visitors at the home of Mr. and Mrs. Jim Bushby.

Mrs. Jim Cooper and son, Jimmy, are visiting in Banff with the former's daughters, Joyce and Jean.

Mrs. W. Grose of Calgary spent the weekend at the home of her parents, Mr. and Mrs. C. Dieck Sr.

Miss Marie Bell and Mr. Murray Saunders were married Saturday at a quiet ceremony held in Calgary.

Frank Sherring and George Leavens of Garrett Motors staff spent a couple of days at the General Motors school held last week in the Armouries, Drumheller.

A large number of fans took in the Stampeder-Roughrider football game in Calgary last Friday.

Visitors at the Ted Sherring home over the weekend were Mr. and Mrs. J. Ansley and Mrs. McWilliam, all of Calgary. Mrs. Ansley is the daughter of Mr. and Mrs. Sherring.

Mr. and Mrs. Percy Smith of Calgary and Mr. and Mrs. Leon Coates recently returned from a two week motor trip through the States, going as far south as Texas in their travels.

Art Humphrey's body shop is rapidly being built, with the four wall now being completed.

## ISADORE GUTTMAN PASSES IN CALGARY

The Carbon district was saddened Thursday to learn of the death in Calgary of Mr. Isadore Guttman, for many years proprietor of the Carbon Trading Co. in Carbon. Mr. Guttman was 68 years of age.

Born in Suzava, Roumania, Mr. Guttman came to Canada as an immigrant. He operated a hotel in Ootokos for a number of years and then took up a homestead at Trochu. He came to Carbon in the early twenties and operated a clothing store until selling out and retiring in the spring of 1946. Following his retirement he lived in Calgary until the time of his death last Thursday.

Funeral services were held in Calgary Friday, November 11, and interment was made in the Jewish cemetery.

## Avondale Club Is Reorganized

The Avondale Junior Red Ball Club after a year of inactivity reorganized Friday, November 11, at a meeting in the Berkeley school.

Honorary president is W.D. McDonald; president, Don J. Buyer; Carbon vice-president, B. Schmalz; Beltsville secretary-treasurer, Bruce Pearson. Acme Club leader is John Yelloweaves, Acme.

The advisory committee will consist of W.D. McDonald, Grainger, John Yelloweaves, Acme, Gordon Ward, Grainger, Val Schmalz, Beltsville and Emil Kempler, Carbon. The club has 15 members.

Club leader John Yelloweaves, and Gordon Ward of the advisory committee were members of this same club when it was first organized in 1933 and Mr. McDonald was the leader of the club at that time.

After the organization meeting the members visited the McDonald farm where they judged showhorns with Don J. McKinnon of Carleton Place, placing the cattle. District agriculturalist N.F. Bell of Drumheller, represented the Department of Agriculture.

## IF YOUR SHOTGUN FAILS, TRY THIS ON A GANDER

(From The Hanna Herald)

Every hunting season brings its quota of stories, some bordering on the "remarkable" but nevertheless adding to the color and enjoyment that goes with the outdoor sport. One was heard the other day that "takes the cake." It concerns the good old days when geese were apparently very plentiful, and men were a bit more resourceful than they are now days.

The story goes something like this:

A traveller making his rounds in a car of ancient vintage, was coming along the road just as it was getting dark. You guess it: the car stalled. The traveller got out to take a look under the hood, and on straightening up noticed in the haze of the sinking sun several objects darting past him on either side. On closer investigation he discovered they were geese. Yes, indeed literally hundreds of them, going by at short intervals.

Here's where the resourcefulness comes in. Quickly sizing up the situation, the traveller stepped on the side of the road and picked up a willow post. From there on it must have been a merry old time. For when he got finished swinging the post, and after catching his breath, he had actually slugged 47 ganders into submission.

The story is told as gospel truth, and the action was supposed to have taken place twenty-five years ago. It is difficult to say if the traveller is still living to substantiate the story but one thing for sure is that no one in this modern day ever saw geese come in like that, let alone put the willow to them.

You live and learn from your elders. Those who have had poor luck this year on geese might lay aside their rusty 12 gauge and pay a call to the local lumber yard. They have them there in various sizes, lengths and weights.

## FEMININE FREROGATIVE

Five-year-old Sue was "helping" her daddy at his work bench in the basement. Finally, he tired of her incessant chatter and questions and he asked her to be quiet for a while.

"I don't have to be quiet," stated Sue importantly. "I'm a woman."

## Plebiscite Administrator Meets U.N. Internes

A group of forty young men and women from 28 countries is this year training for an eight-week period at U.N. Headquarters where they are assigned to different departments in the Secretariat to learn the work of the Organization. Here, Admin. Chieftain Nimitz of the United States, U.N. Plebiscite Administrator James and Kashmir, explains his contemplated mission to interested "Internes" Niz Atallah (right) of Pakistan, and Surgit Singh, of India.

## Measures For Safety

**THE EVER-INCREASING USE OF MACHINES** in industry have increased efficiency and production rates to high levels. In spite of this speed and efficiency, however, and the excellent working conditions provided in most modern industrial plants, the chances of accidents are often great and constant precautions are taken to protect employees from receiving injuries while they are at work. Safety engineering has become a highly specialized profession and most industrial plants retain at least one man whose duty it is to keep the number of accidents among workers as low as possible. In large industries there is often a central safety committee, composed of safety officers and officials of the plant, who work together to make working conditions as safe as possible.

### Many Safety Measures Used

There are a number of approaches to the problem of reducing industrial accidents. Safety devices for machines and the removal of hazards in the way of unsafe stairways, elevators and other such structural defects are, of course, important. There is also the need to educate workers to the potential hazards of their machines or tools, and to any other possible causes of accidents about the plant. Careful investigation of the cause of any accidents which do occur, and the rectification of the cause, if possible, is also a safety measure used in most industries, as is the penalizing of any employees who cause accidents through carelessness. Farming, while it is an industry, cannot be compared with industrial plants in which rules can be enforced and constant supervision exercised. However, machines are used very extensively on farms today, especially in the West, and statistics show that farmers are frequently injured in the course of their work.

### Should Try To Reduce Loss

From June, 1946, to June, 1947, the Dominion Bureau of Statistics reported that 37,299 farmers were injured at work, and more than 1,000,000 man days were lost to Canadian farmers due to fires and accidents. Because of the extensive use of machinery on the prairies, about sixty per cent. of the farm accidents occur in Manitoba, Saskatchewan and Alberta, although these provinces claim only about one-third of Canada's farming population. The same methods of preventing accidents in industrial plants cannot be used on the farm, but great efforts must be made to acquaint the farmer with the correct ways of using complex machinery and with the dangers involved in that part of his work. Manufacturers of farm machinery also make special efforts to remove all possible weaknesses or defects which might lead to accidents due to faulty construction of the machines. The importance of anticipating and preventing accidents is stressed everywhere today, and agriculture is endeavoring to keep pace with other industries in cutting down the number of man days lost each year due to these causes.

**CHAPEL PLANNED**  
WINNIPEG—A chapel in the International Peace Gardens, situated on the border between Canada and the United States, is to be promoted by the International War Veterans' alliance. This was decided at a meeting of the alliance here.

### How I Subdued Wild Fiery Itch—

**WORST MISERIES OF CHILDREN'S**  
**Colds Relieved Overnight**

Warning, soothing relief from the misery of children's colds comes quickly when you rub on Vicks VapoRub as bedtime. Often by morning most of the distress of a cold is gone. VapoRub is so effective because of its specific double action. First, VapoRub penetrates deep into cold-congested bronchial tubes to relieve congestion. It soothes the throat. At the same time, it stimulates chest and back areas, like a warming, comforting blanket. The night you rub VapoRub on your child's chest.

**Take Vitamins**  
**Allenbury's Haliborange**  
**The Nice Way**  
A teaspoonful of Haliborange contains 450 International Units of Vitamin A, plus 95 I.U.'s of Vitamin D. Mixed with water Haliborange makes a health-building pleasant serving orange drink.  
From All Drugists, 85¢, \$1.50 and \$2.75.

### Tame "Wild" Mallard Duck

Photographed on the 800-acre property of Mr. and Mrs. Charles Mercer, Trout Creek, Ont., the centre of interest is the "wild" Mallard Duck hatched and raised by the black hen at right in picture. The speckled birds are Guinea Fowl.

## Hayfork Installation Plan

Drawing of hayfork installation where there is no track. It is only one end of the rope. The end of the rope then passes through the pulley over the move, then down through the pulley over the hayfork, up through the pulley over the other move and down to the draw pulley at the barn horn. If the other move is to be filled the end of the rope now on the fork is run down to the horses while the end now running to the team is attached to the fork. In timber frame barns with collar beams it is sometimes necessary to nail planks vertically to the beams to prevent bundles from catching under the beams on their way up.

**FUNNY And OTHERWISE**  
Blacksmen, we read, are good for chasing roaches out of a home. Are they as effective with relatives?  
"He's crying because I'm eating my cake and won't give him any," Tommy replied.  
"Is his cake finished yet?"  
"Sure—and he cried, while I was eating that too."  
Stranger (to merchant)—Do you find that married men or single men make the best clerks.  
Merchant (whispering)—Married men. They are not in such a awful rush to get out of the place and get home.

A little girl who attended her first church wedding turned to her mother as the bride left and asked: "Mummy, why did she change her mind?"  
"She didn't change her mind," the mother answered. "Why do you think so?"  
"Well," said the little girl, "she went up the aisle with one man and came back with another."  
A tournaquet and a wedding ring have one thing in common, observes a wisecracker. They both stop circulation.  
Looking up from his book, "what are diplomatic relations?"  
"My boy," said his father, "advice," there aren't any."  
"Daddy," said little Johnny.  
Junior: Mother, I'm the best looking boy in Sunday school.  
Why, Junior! Who told you that?  
Junior: Nobody, mother. Nobody didn't have to tell me. I saw all the rest of them.

**"Say Goodbye to Backache"**  
—SAYS GRANDMA  
Backache is a misery that strikes many women in middle life. But if you could see Mrs. W. H. of Welland, Ont., a grandmother well past 60 working in her nest little home, day after day, you would really appreciate the magic Dr. Chase's Kidney-Liver Pills do to relieve backache.  
That's because this time-proven Dr. Chase remedy for backache treats two conditions at once—contains special remedial ingredients for both the kidney and liver disorders which often cause backache. So don't suffer with painful joints and backache—try this reliable remedy proven by over half-a-century's use. Dr. Chase's Kidney-Liver Pills. At all drug counters.

### MARCH OF DIMES

OTTAWA—A national Canadian March of Dimes campaign was approved by the Canadian Foundation for Polio Research. The drive is expected to get underway in January.

One hundred pounds of wheat yields 70 pounds of flour.

### Provinces Sent Record Exhibits To Winter Fair

WINNIPEG—Livestock breeders assembled the biggest exhibit ever entered from Manitoba in the Royal Winter Fair at Toronto.

The exhibit included 37 horses, 80 head of cattle, and 48 swine, property of 63 leading Manitoba farmers. All entries were picked by committees of the breed organization.

REGINA—About twice as many best cattle was shown by Saskatchewan exhibitors at the Royal Winter Fair, according to C. E. Beveridge, provincial livestock commissioner.

The nine carloads of livestock represented Saskatchewan in the Royal competitions left Regina and Saskatoon and were made up of about 40 horses, 35 cattle, 30 swine and a small number of sheep. Leaving from Regina were two cars of horses, three cars of cattle, and a car of swine and sheep. These were joined at Melville by three cars of horses from Saskatoon.

## Estimate Life For Turner Valley Gas Given As 10 Years

CALGARY.—Estimated life of the Turner Valley natural gas reserves has been reduced to 10 years, Stanley J. Davies, gas engineer for Calgary, told the board of public commissioners here.

In 1939 it was estimated that the reserves at Turner Valley would last for 30 years.

Shortening of the "life" of Turner Valley reserves was due chiefly to the increasing use of gas by big industrial consumers, the board was told.

When laying hens are allowed to graze in soggy yards or to drink from stagnant pools, they lay dark yolks, and the eggs may even be off-flavour.

## Information Of Value

# Farm Business Survey in Central Alberta Embraced 318 Farms

Information of value to the continuing development of agriculture on the prairies is contained in a survey of farm business in Central Alberta recently published by the Economics Division, Marketing Service, Dominion Department of Agriculture, in co-operation with the Department of Political Economy, University of Alberta.

The survey, covering the fiscal year 1943-44, embraced a total of 318 more extensive type of farms in three districts in Central Alberta—Insallist in the black soil zone, Drumheller and Gadsby in the dark brown soil zone.

Begun in June, 1944, the survey was part of larger enquiry into the economic and social problems associated with the utilization of the land in the Prairie Provinces which was initiated in 1935 with the passing of the Prairie Farm Rehabilitation Act. The western boundary of the region defined as the drought area for the operation of the PFRA Act cuts through Central Alberta. To gain comparative pictures of conditions affecting farm income within and without the drought area, the districts chosen for the survey were located on that western boundary line within and one outside.

In the Insallist district—the one outside—the three-fifths of the farms were of the livestock type. In Drumheller more than two-fifths of the farms were grain type farms. In Gadsby about three-fifths were mixed grain and livestock, and one-fifth were grain, one-fifth were livestock type.

In size, the farms studied averaged 348 acres in Insallist, with 64 per cent. improved; 685 acres in Drumheller, 78 per cent. improved; and 1,044 acres in Gadsby, 56 per cent. improved. The average value per acre was, respectively, \$41, \$36, and \$39. Average capital value of the 318 farms worked out to be \$1,100,000, made up of \$1,000,000 in real estate, \$100,000 in machinery and equipment, \$2,000 in livestock, and a balance in seed, feed and other farm supplies. Grain farms carried the highest average value per acre, \$41,000.

The livestock type of farming in the Insallist district, mainly hogs and dairying, was considered as semi-livestock.

tensive when compared with the 1943-44, embraced a total of 318 more extensive type of farms in three districts in Central Alberta—Insallist in the black soil zone, Drumheller and Gadsby in the dark brown soil zone.

Averaged for all types studied, crop receipts from livestock and livestock products were about the same as from direct sales of grain. Labour earnings were nearly \$1,100 per farm.

During the year of the survey, crop yields were only two-thirds of normal in the Insallist district, approximately normal in the Drumheller and considerably above normal in the Gadsby district.

As to the surplus earnings above operating, capital maintenance and family cash living expenses averaged less for Insallist farms than for farms in the other two districts. Only for the Insallist livestock farms was the average surplus greater than that of the Gadsby farms. Drumheller grain farms had the largest surplus.

But the economists concluded that, in the present farm organization as it operated in 1943-44, based on long-term average yields, prices and costs, the average surplus earnings could be expected from a half-section farm in Insallist as from a whole section farm in Gadsby. On average-sized farms, surplus earnings from Drumheller farms could be expected to average \$1,000 per year.

PLENTY OF ROOM

Not counting the less habitable parts of Canada there are less than seven persons to the square mile, in Holland and Belgium there are 700 persons to the square mile.

## Enduring Styles For Enduring Fabrics

# Decoratively SPEAKING

The stunning coat, (left), is red Velveteen, a chinchilla-like woolen with the finest of pebbly surfaces. A draped calf sweeps matterfully to one side with the same curve repeated on the flaps of the deep-set pockets. Black calf belts the coat to a small, dainty waist. The steamer suit ensemble, (right), is of double-faced fleece, with antique gold on the outside, reversed with olive green sheer wool buttons downed front. The tulle top, (centre), tops a suit or makes one itself when paired with a skirt. Slangy belted, collared and detailed much like an officer's coat, it is a year-round coat—Central Press Canadian.

(By Francis James)

Dear Mrs. James:

Is it permissible to use flowers and stripes in the same room? We have just had our living room re-papered in a rather prominent stripe. The background is medium grey with a narrow stripe in line green and a broader stripe in wine. I am now planning new curtains for the large windows on the west side of the room—and would like to have draw-curtains in flowered chintz. Do you think this would make the room look junky?

Dear Mrs. O. M.:

Since you say that your windows are large, I assume that your room is a good size too. If this is the case, there is no reason at all why you should not combine striped walls with flowered curtains. Very charming effects can be achieved in this way.

U.S. Orders Giant British Helicopters

The world's largest and heaviest helicopter, the British Clerva Air Horse, which gave such an impressive display at this year's Farnborough Air Week has been ordered by several American operators. Delivery is expected in about two years. The Clerva Air Horse recently wound up a series of eight trials by flying at an all-up weight of 17,500 lb., the world's record lift for rotating aircraft—with an average of 2.6 tons per rotor. It is powered by a Rolls Royce Merlin engine and has a rectangular fuselage. The machine has a cargo capacity of 800 cubic feet and can take 24 passengers.

The Great Slave lake, in Northwest Territories, is wholly frozen over for six months every year.

## On The Side -By-

E. V. Durling

HAPPY MARRIAGES

You have heard of the Catherineettes of Paris. If not, please be informed they are young women who have reached the age of 25 without acquiring matrimonial success. Catherine is the patron saint of spinsters. So annually, on St. Catherine's Day, hundreds of girls who are living alone and don't like it that way, get together and make plans to marry. Some of them are called Catherineettes. Another indication that Frenchwomen seldom marry is the fact that they are seldom seen becoming their fate is the success of The Green Ribbon (Les Lèvres Vertes) Club of Paris. This is a matrimonial club for both sexes. Its name is inspired by the fact that when a woman is 25, her lips turn green. They were seeking matrimonial mates. The Green Ribbon Club, now 26 years old, claims to have been responsible for the arrangement of hundreds of happy marriages. The organization has a club house and stages dances and other social affairs. Membership is not easy. It is necessary to pass a searching entrance examination. Only the highest type of technique and intellect are accepted. The Green Ribbon Club are young people whose parents met three years ago.

PROLIFIC PARENTS

The clientele certainly took a wide variety of questions at me. I keep telling them I don't mean them harm, but they don't believe me. Anyway, a Bostonian wants to know what is the greatest number of children a woman can have in her lifetime. Also what is the maximum number of children a man can have in his life. I don't know the answer to either question. However, the most prolific parent on record was Augustus the Strong, King of Poland from 1670 to 1733. He was the father of 350 children!

MULES AND MEN

One woman says her husband remembers everything his secretary wears. "Should I worry?" she asks. Recalling what a secretary wears is not necessarily a cause for worry. It is only when a man remembers the color of his secretary's eyes that his wife should worry. Or so say our mules and non experts.

WEDDING RINGS

What, if anything, is inscribed on the wedding ring you gave your wife? And how about your own wedding ring? Or aren't you one of the romantic group of spouses who wear wedding bands? An appealing inscription is this which one of our wedding ring William Jennings Bryan gave his wife. "I was 1800. She was 1884."

OVER THERE

Recently a horse-race tipster was arrested in London for blocking the sidewalk. After imposing a small fine the magistrate asked the tout for a tip. Not only that, as the tipster left the courtroom he was surrounded by a couple of hundred spectators seeking to buy his tip service. It seemed the officer who had arrested the tout had said his tips were "very good."

Men over 40 who patronize matrimonial agencies seldom express a desire to meet women over 40. The middle-aged and elderly seekers after matrimonial mates are only interested in women of 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100. That is because in the 22 to 35 age group there are usually more men registered than women. And there are usually more young fellows are interested in women over 40 either. Yet despite this depressing situation the women over 40 remain optimistic. There are said to be 12 times as many women over 40 registered with matrimonial agencies as there are men over that age registered.

HUSBANDS

Many women constantly complain of the reluctance of their husbands to attend parties. Perhaps the husbands are not entirely to blame for this situation. Possibly the hostesses are. The majority of present day hostesses are in a rut. Their parties are usually dull because they are lacking in originality. They haven't what it takes to arouse the enthusiasm of prospective male guests. It has always been the policy of this department never to express a criticism without offering a suggestion. So here, therefore, make a suggestion as to how a hostess might have a party that would make it with all the males in her vicinity. Invite all the good-looking women possible and then, instead of playing hostess, play post-office.

HORSES AND WOMEN

Long-legged women and short-haired wives are the most difficult for husbands to fool. Women with gray-green eyes are the most difficult for a man to deceive. Brown-eyed women are very attractive, but their flirtations are generally of the harmless variety. But when a black-eyed woman tries to fool a fooling. Tall women are more sincerely affectionate than small women. The cat, little black cat on their husbands' laps because they crave attention and seek flattery. When a statuette wife does likewise she is only because she sincerely loves you. The foregoing are excerpts from Our Horses and Women File No. 34,650 which is labelled: "One Thousand and One Things Every Young Man Should Know."

## HEALTH

# Much Progress Made In Cancer Control

The past 10 years have witnessed at least two major advances in the more effective treatment of cancer, it is stated by Dr. H. Warwick, Executive Director of the Canadian Cancer Society, in an article—"Progress in Cancer Control"—in Health, Canada's National Health Magazine published by the Health League of Canada.

"Improvement in the technique of anaesthesia and in our understanding of the pre-operative and post-operative care of seriously ill cancer patients have enabled surgeons to reduce very materially the risk of major surgery," Dr. Warwick states. "They have also enabled the surgeon to perform operations which were before considered not practical. The other advance has to do with the discovery of the fact that certain compounds, when given to cancer patients, will inhibit and even cause regression of tumour growths for periods of a few weeks to several years."

Of still 10 years ago even the most optimistic of cancer research workers despaired of the possibility of ever finding a cure for cancer. At least six of these now have taken place in the treatment of cancer patients and which they can be said to cure cancer, they will, nevertheless, give comfort and relief to certain cancer patients for months and even years. It is the investigations of the method of action of these compounds which holds so much for the future. In at least six of our Canadian university laboratories such studies are being pursued."

Dr. Warwick comments that the one unfortunate thing about cancer today is that, although many forms of cancer are now being cured, the patients with these forms of the disease do not report unusual symptoms of relief. In some cases, however, months or even years before doing something about it," he writes. Forms of cancer which are now being cured include the skin, breast, stomach, mouth and bowel are, with the exception of the stomach, most symptoms of the disease which can be most effectively brought to a halt. Some of these common forms of cancer include a lump in the breast, unusual bleeding from the rectum, a change in the skin or mouth which does not heal, and a change in bowel habit, such as persistent constipation or diarrhoea.

## Five Reasons Why Businessmen Are Tired

PHILADELPHIA—What makes a "tired businessman" tired? Maybe, says the Benjamin Franklin clinic of the Pennsylvania Hospital, because he:

- 1—Stuffs his business troubles in his briefcase and takes them home at night.
- 2—Doesn't know — or practice — moderation in his work or play.
- 3—Can't take a real vacation because he thinks he's too indispensable.
- 4—Doesn't have a hobby but goes out once a week for a strenuous workout to cure all his ills.
- 5—Doesn't know — or practice — moderation in his work or play.

That's the thumb-nail sketch of the clinic painted from its treatment of 2,000-odd tired businessmen since February 1943.

Many have come to the clinic from industrial and business concerns whose owners would like to keep their keymen hale and hearty.

An ice-yacht can attain a greater speed than the wind which drives it.

## : STAMP CORNER :

By JAMES MONTAGNES

New issues recently received in Canada include (top left to right) Yugoslavia's overprinted airmails, showing soldiers on parade, Hungary's stamp to a youth congress held at Budapest this past summer; Kestor's official stamps portraying Franklin Roosevelt and (lower left to right) Austria's stamp to Commemorate Anton Bruckner, 1824-1896, Germany's stamp to the 1943 Leipzig trade fair and a stamp showing Russian merchants at the fair in 1939, and Hungary's stamp to Soviet friendship.

Among the most popular special collections is that on which railways are featured. Engineers, railwaymen and model railroad enthusiasts especially favor collections of railway pictorial stamps. A number of countries have issued such stamps, showing the various modes of transportation. With the 75th anniversary of the Universal Postal Union now being marked by most countries, quite a few are featuring railways as one of their special subjects.

Railway stamps have been issued by countries everywhere. The Belgian Congo last year issued a stamp marking the 50th anniversary of its railway service, showing a locomotive in the jungle station. One of the most detailed railway locomotive stamp sets is that of Egypt, issued in 1934 for the International Railway Congress held there that year, the stamps showing the various types and types of locomotives.

Great Britain, where the railway made its first appearance, has never issued a stamp to the railways. But Canada shows railways on a number of stamps, including the 39 cent harvesting scene of the 1928 issue, the 1934 issue showing a steam locomotive, the 1937 historical issue, and New Brunswick's one cent value of 1960. While Newfoundland issued its own stamps, the United States issued its first express train in shown on the five cent value of the 1928 pictorial set. The United States issued its first railway pictorial stamp in 1869 on a three cent value. It was the first Pan-American Exposition set had a self-addressed stamp for reply.

**REPORT CRITICIZES ROYAL CANADIAN NAVY**—Almost everything under the heading "Royal Canadian Navy" came in for criticism in the report of the royal commission, inquiring into its affairs after "mutinies" aboard the aircraft carrier Magnificent, the Athabaskan and the Crescent. Report was tabled in Commons. Here is the Magnificent arriving at Halifax after a cruise.—S.N.S. photo.

**HEALTH MINISTER LAYS CORNERSTONE**—Federal Health Minister Paul Martin is shown above as he laid cornerstone for a new \$2,500,000 Kitchener-Waterloo hospital. The new hospital, he said, would help the Dominion reach its goal of 40,000 new hospital beds by 1963.—S.N.S. photo.

**CONSERVATION WORK REWARDED**—Years of planning, work on conservation program for his farm have paid off in many ways for W. C. Harris. King Creek Farm, near King. He uses contour plowing, has planted windbreaks and given the land a general face lifting. Reward for his work was received recently by Mr. Harris when Eric W. Baker, chairman of the Humber Valley Conservation Authority, at left, put up sign.

**CHAMPION SUFFOLKS**—Champion Suffolk ram at the Regina Fall Fair was won by J. E. Moffat of Sinitata, Sask., while Mrs. James Whitehead of Saskatoon won the reserve champion. 2855

**GETS APOLOGY**—Ben Rachlin, (above), presented evidence in magistrate's court at Georgetown, Ont., to prove that Constable Ray Schilder had been mistaken in arresting him for speeding and resisting an officer. Magistrate Langdon found the accused not guilty and apologized for humiliation caused to Mr. Rachlin.

**CHAMPION YORKSHIRE**—There was a big entry of shorth and twice at the Regina Fall Fair. A. H. Dyck, Borden, Sask., had the junior and reserve grand champion Yorkshire boar shown above.

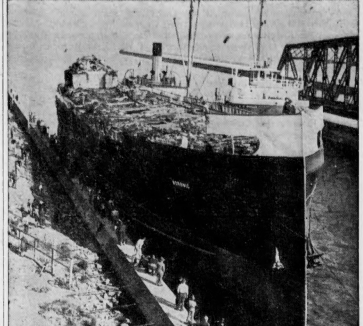

R. H. Howarth, Wavota, Sask., had the champion sow.

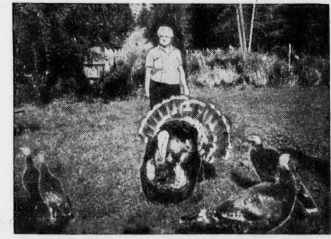

**STUDENT STABBED**—Sidney Norman, 15, a pupil at Ralph Road public school in Leaside, Ont., is in the Hospital for Sick Children after being stabbed in the stomach during a class soccer game. Playmates say Sidney was stabbed when he got into an argument with the referee, a 14-year-old student, left in charge of the boys by Anna Taylor, teacher for grade VIII.—S.N.S. photo.

**CHOOSE OUTSIDER**—Patry James of Welland, a University of Western Ontario student, was chosen sweetheart of Lambda Chi Alpha, University of Toronto fraternity, after the football game. This is first time fraternity has gone outside Varsity for "sweetheart"—S.N.S. photo.

**NORONIC HEADED FOR SCRAP**—Curious spectators get a close-up of the fire-blackened, twisted former pleasure cruiser Noronic as she passes through the Burlington ship channel on her way to Hamilton, Ont., to be cut up. Traffic was tied up for the 20-minute passage of the ship.

**"HUBBLING JOCK"**—The lady feeding the turkeys is Mrs. Wm. Duval, of Ingersoll, Ont. While she and her husband were visiting relatives in B.C. "Hubbling Jock" mothered these young turkeys whose mother was killed with seven of the brood by a hungry coyote.

**TWIN CITIES HAVE UNIQUE DRIVING SCHOOL**—For first time in Canada high school students are being taught to drive safely and well at the Kitchener-Waterloo collegiate and vocational school. Behind the plan are Principal W. T. Ziegler, W. M. Ehler, chairman of special education board committee; Bert C. Hall, who supplied car; A. W. Sandrock, past president, Ontario Motor League.—S.N.S. photo.

## Many Receive Decorations For War Services

More than 60 serving and retired members of the Army, Navy, and next-of-kin of deceased decorated personnel, received decorations and awards from His Excellency the Governor-General at an investiture held at Government House in Ottawa recently. In all, more than 80 awards were presented at the investiture, including decorations to civilians, and to members of the Boy Scouts.

Majority of the Service awards were Distinguished Flying Crosses to present and former members of the R.C.A.F. and to their next-of-kin.

Following is a list of Westerners who received the D.F.C., and also shown are names of next-of-kin at the investiture:

**Flight Lieut. Frederick James Dunphy** (deceased), A. Dunphy (Mother), Winnipeg, Manitoba.

This officer has taken part in numerous operations against the most heaviest targets. On one occasion he was severely wounded and returned to his home in 1945.

**Flight Lieut. Charles Harold Fisher** (deceased), H. Fisher (Mother), Wetaskiwin, Saskatchewan.

This officer has distinguished himself in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Lieut. Ned Jordan** (deceased), J. Jordan (Mother), Winnipeg, Manitoba.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Lieut. Frederick Wallace Meakin** (deceased), M. Meakin (Mother), Regina, Saskatchewan.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Lieut. Nelson Leslie McLeod** (deceased), L. McLeod (Mother), Regina, Saskatchewan.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Lieut. John Joseph R. Grogan** (deceased), J. Grogan (Mother), Vancouver, British Columbia.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Officer Daniel Dominique Platane** (deceased), D. Platane (Mother), Regina, Saskatchewan.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Officer Douglas Graham Brittain** (deceased), D. Brittain (Mother), St. James, Winnipeg, Manitoba.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Officer William Fennelly** (deceased), W. Fennelly (Mother), Regina, Saskatchewan.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Officer Harvey B. Minnie** (deceased), H. Minnie (Mother), Regina, Saskatchewan.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Officer William Fennelly** (deceased), W. Fennelly (Mother), Regina, Saskatchewan.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Officer William Fennelly** (deceased), W. Fennelly (Mother), Regina, Saskatchewan.

This officer has been severely wounded in the most dangerous and difficult operations against the most heavily defended enemy targets.

**Flight Officer William Fennelly** (deceased), W. Fennelly (Mother), Regina, Saskatchewan.

"OLD JOE"—Each year about this time the deer start coming to have a look at the feed and hay stacks the ranchers in Alberta's foothills. This is "old Joe", whose years of success at avoiding rifle bullets have not made him clever enough to avoid having his portrait taken. This remarkable wild life photograph was taken with a telephoto lens from a hide on the foothills deer trails southwest of Fitcher Creek, Alta.

## N.H.L. Sport Notes

**Six N.H.L. Captains**

Not on one exception the captains of the six N.H.L. teams this season are the same as those which skipped their crews a year ago. The only switch is on Chicago Black Hawks where Doug Bentley has replaced George Stewart as Black Hawk captain. The other captains are: Bushy O'Connor, New York Rangers; Butch Bouchard, Montreal Canadiens; Sid Abel, Detroit Red Wings; Ted Kennedy, Toronto Maple Leafs; and Milt Schmidt, Boston Bruins.

## Three U.S.-Born Players

Three United States-born players in the National Hockey League this season. They are Frank Brimacombe, New York Rangers; Dussault, Montreal left winger; and Pete Babando, left wing on the Detroit Red Wings. Brimacombe was born at Eveleth, Minn., Dussault at Springfield, Mass., and Babando at Bruchard, Pa.

## Youngest Line In League

The youngest forward line operating in the N.H.L. today is composed of Boston Bruin's High Line of Ed Sandford at Centre, Dave Creighton at left wing and Zeno Toppanzini at right wing. Creighton and Toppanzini are only 19 years old, while Sandford is the oldest at 21. They're dubbed the High Line on account of Sandford being six foot, five-inch tall, and Creighton and Toppanzini standing an even six feet.

## Red Wings Really Flying

When people say that the Detroit Red Wings are really flying this season, they are sure aright. The Red Wings are the first N.H.L. team to take to the air this year. They went to Montreal from Chicago for their game against Canadiens. Immediately after the game they made the return trip to Detroit by air for a return engagement against the Habs.

## EMPLOYMENT SERVICE TO HIRE FOR POSTAL RUSH

The National Employment Service will be hired this year through the National Employment Service, the labor department announced. Previously, additional employees were hired by individual post masters. Only unemployed persons will be taken on the department said, and preferences will be given veterans and those on Civil Service commission eligible lists.

A gallon of distilled water weighs 8.345 pounds.

## At Last! Something New In Snow Removal

By HENRY C. NICHOLAS  
(Contributor from Canadian Correspondent)

Falling snow from the heavens may be a beautiful thing to poets, a joyous experience to youngsters, but to municipal officials and business men it is just a plain old-fashioned pain in the neck.

A heavy snow storm paralyzes urban life, slows down business activity almost to the vanishing point. The direct cost to Canadian municipalities for the removal of snow from the streets every year runs into millions of dollars, while the even greater loss suffered by business cannot be estimated.

In spite of our great technological progress the removal of snow from city streets remains today as much of a problem as it was 50 years ago. Municipalities still tackle this job in just about the same inefficient manner as city officials did when grand-father was a boy.

However, this winter will see something different. Following the first heavy snow storm the residents of some cities will witness a strange sight. Growing, smothering monsters with a seemingly unquenchable thirst will be seen moving over the highways, drinking up the snow as fast as it is piled up. These monsters, instead of being dead and ready for traffic, at least, this is what municipal officials and business men hope to see this winter.

There have been over 600 patent applications during the last 30 years for machines for the removal of snow from the streets, and many of them proved to be practical when tested.

As it has happened so often in the past, inventors working independently of each other have now almost simultaneously come forth with almost identical solution, a machine which, in the first place, is a rotary grinder which grinds the snow into small pieces and drops it into the middle of the gutter.

Several huge blowtowers mean while are running on aerosols and maintaining about 200 degrees of heat inside the truck body. The snow falling into the interior is immediately melted and the water is collected in a 500-gallon tank under the chassis.

The disposal of the water is no problem. If the weather is warm a large valve can be opened and the water allowed to run into the gutters. Should the temperature be below freezing the water is collected and run into catch basins along the streets.

If the Snowmelt proves as efficient as engineers expect, most of the expense of snow removal in cities may be a thing of the past.

It is estimated that about 90 per cent of this cost is in the hand shovelling of the snow into trucks, the rental of the trucks and the cutting away of the snow to some remote place where it won't be a hindrance to traffic.

If the Snowmelt works about the way it is supposed to, it will save a lot of money to the city. It will save a lot of money to the city. It will save a lot of money to the city.

It will save a lot of money to the city. It will save a lot of money to the city. It will save a lot of money to the city.

# New "Links" Almost Complete Man's Anthropological Chain

By JOHN F. REMBOWER  
(Central Press Canadian Correspondent)

While scientists all over the world are pressing ahead their century-old hunt for the fabulous "missing link," a geologist at Northwestern University in Chicago has found out how to produce the rise, decline and extinction of living creatures.

By taking a sort of fossil census and counting the number of animals present in rocks dating back a half billion years, Dr. Laurence L. Blose can show that each great life group started with a few types, rose to a large number, and then skidded toward extinction.

The horse, for example, is on the way out as an animal, says Dr. Blose. Soon it will be gone; that is, in only 10 or 20 million years—a mere instant as geologic time is figured.

Only the smallest and ruggest reptiles are left from the days of the giant dinosaurs, Dr. Blose points out. However, though he feels that now he can put his finger on the stage of development of almost any creature, there is one that stumps him—man himself.

That has been the predicament of scientists since 1871, the British scientist Charles Darwin's explanation and started one of the hottest controversies of all-time by announcing a theory that man and ape had a common ancestor somewhere along the line millions of years ago.

Scientists found Darwin's theory so plausible that they picked it up and today virtually all of them accept it. But where is the "missing link" that finally would establish the chain and conclusively prove the theory?

To this day it never has been found. Scientists for decades have hunted for him in two places—among the rocks where remains of almost all other living things have been found, and in the swamps and out-of-the-way places where maybe some grotesque half-human hangover might be found.

Until such evidence is found, the famous Darwinian theory appears to have a gap to be filled. It is called missing link that keeps it from positively including man in the overall pattern.

In recent weeks scientists have felt that they had organized a solution to the riddle than ever before.

Startling reports have poured in to them from South Africa, where diggings have turned up some of the most remarkable fossils in history, including the remains of a creature answering the description of a "missing link," and Morocco, where two Dutch explorers came upon a "living apertian" which seemed to be truly an "ape man," a bridging "missing link."

Tipped off by Berber tribesmen, the explorers carried the "ape man" in his hands near Skoura, Morocco, and took pictures which are on route to the Hague, Netherlands, for detailed study by scientists.

He is said to have abnormally long arms, short legs, and virtually no forehead. He lives in the night, and makes only "snarling sounds" instead of talking.

Recently Heinrich Heck, Munich, Germany, also directed, started studies with the statement that he could produce a living "missing link" on order, if he wanted to, which he doesn't.

After a quarter-century of experimentation in "breeding backward," Heck has brought back the aurochs, ancestor of the common milk cow of today. An ugly, stocky, blackish-brown, long-haired animal with a bad disposition, the aurochs originally became extinct in 1627, until Heck "recreated" it.

Rather than finding a living ape-man or trying to "recreate" one, scientists put greatest store in the

The "Missing Link" is missing from this gallery of "ancestors".

possibility that among the fossils served as a perfect "tomb" for ancient remains. Dr. Blose and Dr. Raymond Dart, another South African, found a skeleton which only an expert could differentiate from that of an ape.

However, their eyes bugged out when they saw teeth like a human's and a skull with a brain capacity between that of the largest apes and the smallest skulls of man.

Dr. George B. Barbour of the University of Cincinnati, a member of an expedition sent from the University of California to investigate the sensational claims, is so impressed with the discovery that he says "the search for the 'missing link' may be drawing to a successful close at last."

## Canadian Sugar Beet Crop Sets Record, 1949 Sales Show Boost

Rising demand for sugar resulted in an increase of total sales to 718.7 million lb. during the first seven months of 1949 from 710.5 million in the corresponding period of 1948. This total was made up of 94.7 million lb. of beet sugar and 624.0 million lb. of cane compared with 78.6 and 631.9 millions respectively in 1948.

The method by which the Canadian industry obtains its supplies is of interest. In the first place, the British Government buys the total British West Indies output and allocates a portion of it to the Canadian sugar controller. This amount together with the domestic output of beet sugar is not sufficient to supply Canadian demand and must be supplemented by purchases from the dollar area.

The amount required from the dollar area of anywhere up to 300,000 tons is thus dependent on crop conditions in the British West Indies and in the Canadian sugar beet area. This year the Canadian sugar beet crop hit record levels and the amount required from Cuba and other dollar sources will be correspondingly reduced.

Easier prices for field crops com-

petitive with sugar beets plus an improved labor supply available to the sugar beet farmer resulted in the best sugar beet crop in Canada since 1941. In 1948 refined beet sugar accounted for 21 per cent of total domestic sugar consumption and the estimate for 1949 is around 20 per cent.

The price of sugar continues to be fixed by the Canadian government and consequently any benefit which might be derived from sterling devaluation will be dependent upon the policy adopted by the Government.

## Find Girls Neater But Fussier Than Male Students

MONTREAL.—The protests of young bachelors to the contrary, girls are tidier than boys—says Mrs. J. C. Grant of McGill University.

The habits of boys and girls living away from home at university are well known to Mrs. Grant, who supervises the McGill rooms registry, finding accommodations for out-of-town students in crowded Montreal.

"The girls are apt to be more tidy than boys," she says, "making their own beds and cleaning up after themselves if they have kitchen privileges."

But, says Mrs. Grant, girls are a headache when it comes to placing "them in rooms. They're fussier and require more privileges."

Students come to Mrs. Grant, from all parts of the world—South Africa, India, England and the United States.

"The dream of every student is to get a room a stone's throw away from college," says Mrs. Grant. As far as price is concerned, they consider between \$5 and \$8 reasonable for a room. However, there are a few registered at \$10 and \$12.

Hubbard: "I've got to discharge that chauffeur of mine—he's nearly killed me four times."

North Carolina claims to maintain more highway mileage than does any other state in the union.

## Paint Bucket Not A Stew Kettle, Says Expert

"The practice of adding a touch of this and a bit of that to a mixture may be all right in the stew kettle, but it's usually wrong in the paint bucket," according to John C. Moore, Director of the Scientific Section of the National Paint, Varnish and Lacquer Association.

"So often, a painter or a householder attempts to mix his own paint and upsets the delicate balance between the pigment and oil combinations, causing inferior results," says Mr. Moore.

Paint formulas these days are as scientifically balanced and compounded as a doctor's prescription, and when the products reach the consumer, they need no additions, unless specifically recommended on the label. They are nearly perfect as millions of dollars worth of research and experiment can make them.

When the user goes against directions and tampers with a paint product, he destroys the protective qualities and the beauty of a paper-thin coat.

Back in the days when paint was made from only lead, oil, and zinc, it was the custom for house painters to be thinned according to the exposure to be painted. On the shady sides of the house the user reduced the paint with turpentine—on the sunny side, he reduced it with linseed oil.

This was supposed to equalize the wear on all four sides, and was fairly effective as the paint dried to a hard and brittle. But now, with especially designed oils and resins, and with titanium as the principal pigment, a uniform coat wears equally well on all sides when the proper thin thickness is applied.

The consistency of a product in the can does not tell the story of that paint. It must be applied, and applied properly, to prove its merits.

So often, the user improperly does the product with thinner, and when a faulty job results, the blame wrongly falls upon the paint. Paint misadventures such as cracking and peeling may be avoided by following down the surface before recoating and by exerting a little extra effort during the time the paint is avoiding thick films.

Users also add thinners thinking that upon opening the can, the product begins to lose its volatile materials. Actually, this loss is too small to rate consideration.

In a recent test, a 200-gallon tank of paint was allowed to stand open from five o'clock in the afternoon until eight o'clock the following morning. During that time the more than a pint of volatile materials escaped even though a 200-gallon can weighs 2,429 pounds.

The manufacturer's instructions on a can label are insurance that a surface will receive treatment which not only beautifies, but which protects against such ever-present enemies as moisture, rust, and decay.

These instructions should be followed as faithfully as those on a medicine bottle label and thinning should not be done unless so indicated.

## Women Cause Of Exploration Claims Explorer

LONDON, Ont.—What makes a man risk his life to explore the Arctic?

"Women!" said Sir Hubert Wilkes, noted explorer who will make his 20th trip to polar regions this winter.

He told students and faculty at the University of Western Ontario recently:

"Women have instigated exploration and discovery from the beginning. Henry VIII sent out men to find a passage to India so he could have jewels and spices to give to his ladies. When they stumbled across America in that attempt, the Hudson's Bay Company was opened to win the ladies' favor with furs."

"And now the example of the Arctic," Sir Hubert stopped and smiled. "He would be drawn out no further on the subject."

## Bigger Candy Bars For Same Price In U.S.

CHICAGO.—This nation's sweet tooth is being enticed by bigger candy bars at the same price.

Candy manufacturers have increased the size of their product 12 per cent. A year ago the average size of a nickel bar was one and one-quarter ounces. Today, the association pointed out, the size is one and one-half to two ounces.

## Helpful Hints

Before you launder sweaters or T-shirts, run a thread around the neckline and cuffs, drawing it to the desired size. This will prevent stretching while the garment is being washed.

Don't forget to wipe the kitchen range quickly with warm water and mild soap when you finish the dinner dishes. Never use steel wool on enameled surfaces.

## Survey Shows Many People Miss Chance Of Early Cancer Diagnosis

NEW YORK.—A survey showed that 49 per cent of the population of the United States does not recognize even one cancer danger signal. The survey, made by the survey center of the University of Michigan, was announced at the annual meeting of the American Cancer Society by Melford R. Runyan, executive vice-president of the society.

He gave results of the survey to more than 300 cancer control workers, and said that they showed only a minor percentage of Americans could recognize any one symptom.

"The vast majority of potential patients may still be missing the chance for early diagnosis and effective treatment," he said. "This is a challenge, the answer to which is largely in the hands of you people on the state and county level."

Runyan said the survey showed the following results:

1. A lump or thickening in the breast or testicles was recognized as a danger signal by only 33 per cent of the population.

2. Any sore that does not really heal by only two per cent.

3. Any unusual bleeding or discharge by two per cent.

4. Any change in normal bowel habits by three per cent.

5. Persistent indigestion or difficulty in swallowing by six per cent.

6. Any persistent hoarseness or cough by two per cent.

Runyan said that the society's own statistics now estimate that 32,000,000 Americans now alive will die of cancer unless new means of control are found.

"This estimate is considerably higher than the one we had been using," he said, "due largely to general advances in medical science which have reduced the importance of pneumonia and other diseases as a cause of death."

"With 200,000 annual cancer deaths and probably 1,000,000 additional cases occurring during each year, you can appreciate the enormous impact of cancer on the American people and on the American economy."

He estimated that cancer costs the United States about \$900,000,000 each year.

## Salvation Army Redefirms Stand

WINNIPEG.—Salvation Army officers in council sessions conducted by Commissioner John Allan, international Chief of Staff, Canada, Eng., and Commissioner Charles Baugh, Canadian leader of the organization, went on record as firmly and deeply concentered over the increased facilities for drinking, and the sharp upward trend of intemperance among people of the Dominion. Their work among drink victims, they said, was conclusive evidence of devastating results in immorality, crime and loss of life.

The disastrous effects of cocktail bars upon young people were particularly deplored, and the standard of total abstinence for the rank and file of the Salvation Army itself was enthusiastically reaffirmed.

Commissioner Baugh restated the Army's objections, on moral principles, to the financing of educational, hospital or other social services from the proceeds of lotteries or sweepstakes, whether or not they are recognized by governmental authorities or by groups and individuals.

The increasing prevalence of games of chance, sweepstakes, lotteries and other forms of gambling were regarded as further evidence of moral decline. Salvationists pledged themselves to maintain their traditional opposition to them.

Throughout the Congress gatherings the utility of the prevailing materialistic philosophy was strongly deplored. Only the establishment of the spiritual kingdom of Christ, with the application of His example and precept in the daily life of the individual and the community would save the world, the Congress statement declared.

## Trousseau-Worthy

For the newsworthy—a set of towels, pillowcases, sheets, decorated with Mr. Mrs. H. H. H. in easiest embroidery stitches.

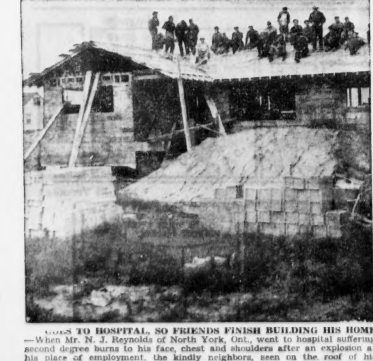

Personalized linens—welcome gift. Pattern 7414; transfer 12 motifs 31" x 8 to 2 x 14 inches.

Our in-wipe pattern—visual with easy-to-use charts and photos, and complete directions—makes needlework easy.

To obtain this pattern send twenty-five cents (plus postage) to: Household Arts Department, Winnipeg Newspaper Union, 68 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

Our Alois Broke Needlework Book has the illustrated designs: crochet, knitting and embroidery; quilts, linen, plus free needlework pattern printed in the book. Send twenty-five cents more, in coin, for this book today!

LEADS TO HOSPITAL, SO FRIENDS FINISH BUILDING HIS HOME.—When Mr. N. J. Hubbard, of North York, Ontario, suffered a second degree burn to his face, chest and shoulders after an explosion at his place of employment, the kindly neighbors, seen on the roof of his home, pitched in to finish the job for him.—N.Y. photo.

GIANT SQUASH.—This giant Hubbard squash weighed 47 lb. and 14 inches long. It was grown on the farm of Mrs. Russell Weddon, Lambeth, Ont., who is displaying the squash.

## OUR COMPLETE SHORT STORY—

## NOTHING TO COMPLAIN ABOUT

By MAX W. ALTH

MR. CLEVELAND, the lawyer, looked slowly from pretty Mrs. Kennin to her husband, and then back again.

"Mr. Kennin," he said, "you may contest this divorce but I warn you that it will only cost you time and money. I have written a great number of briefs in my time and have fought a great many divorce cases. Let me tell you, I will have no difficulty in proving your flagrant contempt for the laws of decent human behavior. I honestly advise you not to prevent your wife's effort to secure a divorce."

Mr. Kennin glowered but said nothing. Mr. Cleveland turned back to his book.

"You poor Mrs. Kennin," he purred. "How you must have suffered from this unsuitable marriage. What mental cruelty you must have been subjected to!"

"My marriage has been a failure," Mrs. Kennin said. "My husband, Mr. Cleveland," she said, "has been for the past 10 years, and it still is."

"I am sure that," the lawyer agreed. "We shall write it all down in our brief. You claim mental cruelty, Mrs. Kennin, as grounds for divorce?"

"Yes."

"Just how does your husband torment you mentally?"

"In a great many ways, a great many ways," Mrs. Kennin replied. The lawyer glared at Mr. Kennin who still said nothing.

"Will you be good enough to relate some of these incidents?" the lawyer said, his pen poised to make the most of every complaint.

"They were awful, simply awful," Mrs. Kennin said.

Mr. Cleveland saw that she would need prompting if he was to prepare a case.

"He abuses at you?"

"Oh, no, Harry is a very quiet man. He never lifts his voice. He drinks too much."

"Oh, no. My husband never touches a drop."

The lawyer scratched his chin with his finger.

the end of his pen. "He has threatened your life? He has given you cause to fear?"

"No, sir. He has always taken great care to see that nothing happened to me. He's the soul of caution."

"We shall find grounds, Mrs. Kennin, never fear. I have had harder cases and have always managed to win one way or another. We can say his conduct has caused you embarrassment before your friends?"

"No, Harry is very polite."

"He stays away from home at night?"

"Harry is home by seven every night."

"Harry is home by seven every night."

"Our Marriage Has Been A Failure," Said Mrs. Kennin.

Mr. Kennin interrupted. "You may be a clever lawyer but I'll fight this divorce. I love my wife."

"You're a brute," Mrs. Kennin retorted. "You have been deceiving your wife. You have subjected her to mental torture."

The lawyer turned back to Mrs. Kennin, determined not to lose a client. "We can work from another angle," he suggested. "He is very close with his purse?"

"Harry is the most generous of men. He earns a satisfactory income, and so far as I have been able to find, has never withheld a cent of his pay."

Mr. Kennin mused. "We shall have this divorce for you before you know it, Mrs. Kennin," he suddenly announced.

Mrs. Kennin looked at the lawyer in surprise. As if he had never seen him before. "The lawyer," she said, "tears and threw her arms around her husband's neck."

"Make him stop saying those nasty things about you, dear," she said. "They are not true. You are good, and you are fine, and you don't abuse me at all. Take me home."

He watched the man put his arm around his wife and lead her outside. The door opened again. Mr. Kennin put his head inside and winked.

Mr. Kennin winked back, and sat down, a broad smile on his face.

RIGHT APPLICANTS SEEK TELEVISION LICENSES

CALGARY—A. D. Duntun, chairman of the CBC's Board of Governors, said recently there have been eight applications by private operators for television licenses in Canada.

"Four were from Toronto, two from Montreal and one each from New Westminster, B.C., and Hamilton," he said.

He said a report of an interview in Victoria "told us three little words—in British Columbia" when quoting him as saying there only one application had been received.

TRY AND STOP ME!

By BENNETT CREE

Ida Kay insists that this happened on a farm just outside Williamson.

On Sunday A. Duntun, a prairie youngster lifted a chicken coop with eggs due every day.

The rooster took one look at the dawning display, ran straight out of the barn, and killed the peacock.

Mr. Roy Washburn was sitting in his husband's sumptuous office when a beautiful stream-lined blonde undulated in. "I'm Mrs. Washburn's wife," said Mrs. W. "That's nice," said the blonde. "I'm his secretary." "Oh," said Mrs. W. "very nice."

As early as 1760, Nova Scotia had 30 sawmills in operation.

## Brings Top Price

ALBERTA FARMERS RECEIVED \$450,000 IN HAIL INSURANCE

ALGARY.—About \$450,000 has been paid Alberta farmers in hail claims this year, Alberta Hail Insurance Board reports.

The \$450,000 is only a portion of the total hail loss suffered by farmers and represents 10 per cent of the total hail loss suffered by farmers.

Insured acreage in Alberta is estimated at 1.5 million, about 10 per cent of total seeded acreage.

The board received 1,238 claims representing 15 per cent of hail insurance policyholders.

Light Wheat Crop

EDMONTON.—Incomplete estimates showed that Alberta had harvested the lightest wheat crop since 1887, the department of agriculture said.

Reports predicted the coarse grains output would be the smallest in eight years. Lack of soil moisture and severe drought were cited as factors contributing to decreased production.

Death Price Of Duty

VANCOUVER.—Death was the price paid by Blackmore Roy, a big collier, who foiled a burglary at his master's home.

Two men climbed him to death recently at the home of John Drummond. Members of the family saw the men as they fled the yard.

College Ski Meet

EDMONTON.—Eleven college ski teams from Canada and the United States are expected to compete in the inter-collegiate meet at Banff early in the new year.

Normie Rault, coach of the University of Alberta team, said

Community Day Planned

FOAM LAKE, Sask.—Plans for a community day in December are being drawn up by a committee appointed at the monthly meeting of the Foam Lake and district board of trade.

SELECTED RECIPES

CHRISTMAS PLUM PUDDING

1 cup stout  
1 cup dark brown sugar  
2 eggs  
1 cup fruit juice  
1 cup raisins  
1 cup figs  
1 cup milk if needed  
2 1/2 cups flour  
1 teaspoon salt  
2 1/2 teaspoons baking powder  
1 teaspoon cinnamon  
1 teaspoon cloves  
1 teaspoon nutmeg  
1 cup candied pineapple and cherries

Soak dry ingredients; add dates, figs, nuts, nut and sugar; then beat eggs and fruit juice. If dough is too stiff add 1 cup milk. Serve with vanilla sauce. Bake 3 hours in a slow oven.

ORANGE PINEAPPLE DESSERT

1 lb. marshmallows, quartered  
2 tablespoons orange juice  
1/2 cup dark pineapple  
1/2 cup heavy cream

Method: Combine marshmallows, orange juice, and pineapple and whip cream. Garnish with marshmallow cherry or orange segment.

SHE GAVE ALL

GREENWICH, Kent, England.—Just before she died, an orphaned, almost blind 18-year-old girl asked that all the money she had should be given to her parish church.

The bequest totalled 24 sh (38 cents).

"It is one of the greatest and most humbling gifts we have ever received," said the vicar Rev. S. H. Hook-on-Shaw.

ALBERTA FARMERS RECEIVED \$450,000 IN HAIL INSURANCE

## Announce Dates For "B" Circuit Exhibitions

PORTAGE LA PRAIRIE, Man.—Keith Stewart, secretary of the Western Canada Fairs association, announced the following dates for 1950 exhibitions on the B circuit: Lethbridge, June 26-28; St. John's, June 28-30; Weyburn, June 30-July 1; Estevan, July 3-4; Moose Jaw, July 5-8; Fortuna, La Prairie, July 10-12; Carleton Place, July 13-15; Yorkton, July 17-19; Melton, July 20-22; Lloydminster, July 24-26; Vermilion, July 27-29; Vegreville, July 31, Aug. 1 and 2; Red Deer, Aug. 3-5; North Battleford, Aug. 7-9; Prince Albert, Aug. 10-12.

## Plan Second Traffic Bridge

THE P.A.S. Man.—Wilfred Cudmore, president of The Chamber of Commerce, has received word from the Hon. Erick P. Willis, that next year's department of public works budget will include an appropriation for a new bridge over the Hudson Bay Railway bridge over the Saskatchewan River.

The extension of the bridge is already in place but has never been used and a new approach must be built from the present roadway.

There is danger in poorly fitting stone and furnace pipes. Escaping coal gas is explosive; a disastrous fire may even be the making.

Mr. and Mrs. Dick Sherring spent the long weekend visiting friends at Ester.

Jim Cheetham of Dutton, Mont. district governor of District No. 33, Lions International, was guest speaker at the Carbon Lions Club Ladies' night held in the Scout hall, Wednesday evening, November 9. The Anglican W.A. catered for the banquet.

Don Pattison of Lacombe visited over the weekend at the home of his parents, Mr. and Mrs. Charlie Pattison.

Miss Norma Cooper of Acme underwent an appendix operation in the Drumheller hospital last Thursday.

Miss Elaine Torrance of Calgary spent the weekend at the home of her parents, Mr. and Mrs. S.F. Torrance.

Miss Viola Embree of Acme attended the I.O.B.E. dance in Carbon Friday evening.

## IN MEMORIAM

In loving memory of a dear Wife and Mother, Mrs. Sophia Martin, who passed away November 18, 1948.

God takes our loved one from our homes  
But never from our hearts,  
How hard it is to part with those,  
We hold on earth so dear;  
The heart no greater trial knows,  
No sorrow more severe.

Ever remembered by the Family

CARBON BAPTIST CHURCH  
Rev. Jacob G. Rott, Pastor

## IT'S YOUR MONEY

Social security payments by the Federal Government last year totaled \$730 millions. That's almost exactly one-third the entire expenditure by Ottawa and almost 50 per cent more than the average pre-war budget (1934-38).

Judged by any standards that is a most substantial sum of money, even for a country as rich and prosperous as Canada. With present buoyant revenues the outlay is only possible by taxation that would have been considered fantastically high as recently as ten years ago. If we encountered more difficult times, and even an optimist can hardly discount that possibility in view of the uncertain world trade outlook, meeting such a bill for largely non-productive social services might create a grave problem indeed.

But high as our present bill is for family allowances, pensions, national health, veterans affairs and other such services, there is steady pressure on the Federal Government to hand out still more. It is time that every man, woman and child realized that the money for social services does not grow on trees or cannot be produced simply by making the Mint put on an extra shift.—The Financial Post.

Drumheller School Division No. 30

THE FIFTH IN A SERIES  
PRESENTED BY  
THE ALBERTA BREWERS' AGENTS  
DEALING WITH

**PREDATORS**  
OUTLAWS AT LARGE

**YOUR CO-OPERATION**  
IS REQUESTED IN THIS SURVEY

To secure a factual appraisal of the actual losses caused by predators, the Western Stock Growers Association is asking Farmers and Stockmen to supply the following information:

1. What damage and number of livestock have you lost to wolves or coyotes during 1949?
2. Have you sustained damage or losses in poultry, or livestock by cougars, bears or other predators?
3. What losses have been caused by humans or rustlers?

The purpose in securing this information is to place the facts before the government in a co-ordinated effort to get effective action to control these predators.
